

CERCLE D'ETUDE ET DE RECHERCHE EN CHIMIE

About us

CERC is the Junior Enterprise of ENSCM, the National School of Chemistry of Montpellier.

CERC aims to bring students closer to the world of business.

As part of a pedagogical approach, students carry out tasks and put what they have learned into practice.

We offer services similar to those of a design office.

The tasks are varied and can be carried out using the equipment provided by the school.

Our services

Organic chemistry:

- Synthesis
- Extraction
- Reactivity study

Analytical chemistry:

- Spectroscopy (NMR, IR, UV-VISIBLE, etc.)
- Chromatography (GC, HPLC, Column, TLC, etc.)
- Mass Spectroscopy
- Conductimetry
- Radiography
- Scanning electron microscopy

Inorganic chemistry and materials:

- Polymer synthesis
- Analysis of materials and study of their properties (traction, DSC, measurement of glass transition and melting temperatures, etc.)
- Study of catalysts

Biochemistry:

- Enzymology
- Drug synthesis

Physical chemistry:

- Reaction Kinetics
- Binary Diagram
- Colligative properties
- Study of physical properties

Contact us

Ibtissem Bourahla
chairwoman

Clara Kiesele
vice-chairwoman

Laurine Palluau
Study monitoring

Matthieu Floccari
Sales manager
