Chimie Montpellier

Cercle d'Étude et de Recherche en Chimie (CERC)

Circle of Study and Research in Chemistry

WHO ARE WE?

The CERC is the Junior Creation of the ENSCM, National Graduate Chemistry School of Montpellier (France). The CERC aims to strengthen the contact of students with the professional world. Thus, by being part of a pedagogical and business-oriented approach, students can carry out projects by putting into practice the teaching they receive. We offer services similar to those of a consultancy office. The missions are varied and can be carried out thanks to the material placed at our disposal by the school.

OUR FIELDS OF EXPERTISE

General Chemistry, Organic and Inorganic

Analytical Chemistry and Computational

Chemistry of Materials and Polymers

Biochemistry

Environmental Chemistry

Physical Chemistry and catalysis

SERVICES PROPOSED

- Bibliography: research on compounds, scientific popularization, translation...
- Synthesis of compounds, materials : elaboration and optimization of a protocol
- Scale-up: from research to industry (including process engineering)
- Analysis and characterization using advanced equipment: RMN, GC, HPLC...
